## Section 1 - CONFLICT MINERALS DISCLOSURE

### **Item 1.01 and 1.02 CONFLICT MINERALS DISCLOSURE AND REPORT**

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended, Weatherford International plc (“**Weatherford**”) evaluated its supply chain to determine if conflict minerals, defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives tantalum, tin, and tungsten, were used in the production or functionality of products manufactured or contracted for manufacture by Weatherford in calendar year 2016.

#### ***Conflicts Mineral Disclosure***

A copy of this Form SD and the Weatherford Conflict Minerals Report, filed as Exhibit 1.01 hereto, may be found on our website at [www.weatherford.com](http://www.weatherford.com) under “Investor Relations” and “Financial Information and SEC Filings”.

## Section 2 - EXHIBITS

### **Item 2.01 EXHIBITS**

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

**SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 30, 2017

**WEATHERFORD INTERNATIONAL PLC**

/s/ Christina M. Ibrahim

---

Christina M. Ibrahim

Executive Vice President, General Counsel and Corporate Secretary

## INDEX TO EXHIBITS

<b>Exhibit Number</b>	<b>Exhibit Description</b>
1.01	Conflict Minerals Report for the reporting period January 1, 2016 to December 31, 2016.

**Weatherford International plc**  
**Conflict Minerals Report**  
**For the Year Ended December 31, 2016**

---

---

This Conflict Minerals Report of Weatherford International plc (“*Weatherford*,” “*we*,” “*our*” or “*Company*”) is in accordance with Rule 13p-1 (the “*Rule*”) under the Securities Exchange Act of 1934, as amended.

### ***Company Overview***

Weatherford is one of the largest multinational oilfield service companies providing innovative solutions, technology and services to the oil and gas industry. We operate in over 90 countries and have service and sales locations in nearly all of the oil and gas producing regions in the world. Weatherford is committed to a culture of compliance and committed to tracing the origins of its necessary conflict minerals to ensure that we are sourcing materials and components from companies that share our values and commitment to human rights, ethics and environmental responsibility.

### ***Product & Supply Chain Overview***

We manage our business through three business groups: 1) Formation Evaluation and Well Construction 2) Completion and Production and 3) Land Drilling Rigs, which together include 14 product lines. We have evaluated our product lines and made a good faith determination that columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten (“*conflict minerals*” or “*3TG*”) were necessary for the production or functionality of some products manufactured or contracted for manufacture by Weatherford in calendar year 2016. These products include, but are not limited to, liner hanger systems, fishing recovery tools, rotating cement heads, downhole deployment valves, pressure control equipment, inflatable packers, casing packers, thru-tubing equipment, wellbore tubulars, casing and running tools, drilling casing bits, centralizers, float equipment, stimulation sleeves, expandable sand screens, composite plugs, inflow control devices, gravel pack systems, production packers, isolation valves, RFID enabled tools, subsurface safety valves, pressure pumping systems, continuous rod products, gas lift valve systems, rotaflex pump units, gas lift systems, power generation units, reciprocating rod lifts systems, flow measurement products, SurgeMaster®II tool, drilling rental tools, performance drilling tools, mechanized rig equipment, conventional tubular running equipment, pump and fluid systems, well servicing equipment, logging while drilling equipment, measurement while drilling equipment, directional drilling equipment, rotary steerable systems, managed pressure drilling systems, rotating control devices, advanced flow detection systems, and steady state continuous flow systems (collectively, “*covered products*”).

Weatherford’s global supply chain is complex with multiple levels of suppliers between us and downstream conflict minerals. Further, our covered products consist of many component materials and parts, with multiple suppliers potentially contributing to a single product. As a downstream company, we do not have direct visibility into, and are always many layers removed from, smelters or refiners of 3TG (“*smelters*”) and the associated mines of origin. We, therefore, rely on our direct suppliers (“*tier 1*”) and their suppliers (“*tier 2*”) to provide the information necessary to trace the source and chain of custody of 3TG that may exist in our covered products.

### ***Reasonable Country of Origin Inquiry (RCOI)***

This year, with continued refinement of our program and processes, we undertook an extensive manual review of numerous data sheets containing engineered design product information to identify direct suppliers in the supply chain of our manufacturing businesses falling within the scope of the Rule. This comprehensive review enabled us to refine the scope of the suppliers we believe are covered by the Rule by identifying specific product or products supplied to Weatherford that may contain 3TG. Our review identified 2,327 tier 1 suppliers within the scope of the Rule.

Weatherford, with the assistance of a third party consultant, contacted the 2,327 suppliers to request and collect information on a product-level as to the use and origin of 3TG. Utilizing the Conflict-Free Sourcing Initiative’s Conflict Minerals Reporting Template (“*CMRT*”), suppliers were asked to provide information regarding the existence of 3TG in specifically identified materials and products sold to Weatherford, and the sourcing of these materials, with the ultimate goal of identifying the smelters and associated mine countries of origin connected to 3TG. If a supplier was unable to provide one or more product-specific CMRTs, the supplier could choose to provide a company level or user defined CMRT. This reporting year approximately 73% of suppliers responded on a product-level basis versus 13% suppliers responding on a product-level basis last year. Suppliers unable to provide a CMRT

on their own behalf were requested to provide relevant information on their tier 2 suppliers. We then contacted these tier 2 suppliers, and subsequent tiers of suppliers as needed.

If suppliers did not respond to our request for information, we made multiple additional attempts to contact them via emails and telephone calls. Through our program and outreach, we continued extensive efforts to educate and inform suppliers who remain unfamiliar with conflict mineral rules and Weatherford's related policies. If, after these efforts, a supplier still did not register within the system or provide the information requested, the matter was further escalated internally and there was direct outreach by a Weatherford.

### *RCOI Results*

The response rate for those suppliers contacted this reporting year was 66% or 1,542 suppliers. This is an increase of 8% from the last reporting year. Of the 1,542 suppliers who responded, 27% indicated one or more conflict minerals exist in the suppliers' materials or products sold to Weatherford and included in a covered product. Based on a reasonable country of origin inquiry, we have reason to believe that conflict minerals necessary to the functionality or production of our covered products may have originated in the Democratic Republic of the Congo or adjoining countries ("DRC"). We performed due diligence measures on the source and chain of custody of the necessary conflict minerals in our covered products, as described in this report.

### **Due Diligence**

#### *Design*

The design of Weatherford's due diligence framework conforms to the due diligence-related steps of Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, second edition.

#### *Measures Undertaken*

Once we received information from suppliers in the CMRT, we evaluated responses for plausibility, consistency, and gaps in information. If, during the evaluation, any quality control flags were raised regarding the veracity or accuracy of information, suppliers were automatically contacted again on a bi-weekly basis up to an additional 3 times to confirm or verify the information. Examples of quality control flags are:

- One or more smelters were listed but no conflict mineral was listed;
- Smelter information was not provided for a used conflict mineral, or smelter information provided was not a verified metal processor in the database of our third party consultant;
- Supplier answered yes to sourcing from the DRC, but none of the smelters listed are known to source from the region;
- Supplier indicated that they have not received 3TG data for each metal from all relevant suppliers;
- Supplier indicated they have not provided all applicable smelter information received; and
- Supplier indicated 100% of the 3TG for products covered by the declaration originated from scrap/recycled sources, but one or more smelters listed are not known to be exclusive recyclers.

With the supplier information collected and evaluated as described above, we used information collected by industry groups and our third party consultant to verify the identified smelters. Through an outreach process we attempted to verify (1) the types of metal processing performed (including exclusive recycling), (2) the mine countries of origin of the conflict minerals, (3) the conflict-free certification status of the identified smelters, and (4) the due diligence measures being conducted for those entities that are not conflict-free certified. We compared the supplier identified smelters to the list of smelters which have received a "conflict free" designation based on internationally accepted audit standards of the (a) CFSI Conflict-Free Smelter Program, (b) the London Bullion Market Association Good Delivery Program and (c) the Responsible Jewellery Council Chain-of-Custody Certification. If the smelter was not certified by one of these internationally-recognized programs, we attempted to contact the smelter to gain more information about its sourcing practices, including countries of origin and transfer, and whether there were any internal due diligence procedures in place or other processes the smelter takes to track the chain-of-custody on the source of its mineral ores. We also performed internet research to determine whether there were any outside sources of information regarding the smelter's sourcing practices. If the smelters were non-responsive, additional attempts to contact them were made to gather information on mine country of origin and sourcing practices.

## ***Due Diligence Results***

Based on the smelter list provided by the suppliers who responded at the product-level and based on publicly available information, we have identified 316 (see Annex I) verified smelters that are within our supply chain. Of these smelters, 201 do not source from the DRC. Sixty-four of these smelters indicated sourcing within the DRC. Of those 64 smelters, all but one are certified as conflict-free. The uncertified smelter was determined to be inoperative prior to December 31, 2016. We were unable to validate the region of sourcing for 51 smelters.

## ***Measures for Improvement***

Weatherford's conflict minerals policy can be found at [www.weatherford.com/en/about-us/ethics-and-compliance/conflict-minerals-policy](http://www.weatherford.com/en/about-us/ethics-and-compliance/conflict-minerals-policy). The policy is also included within our supplier code of conduct ("**Code of Conduct**") and can be found at <http://http://www.weatherford.com/en/about-us/ethics-and-compliance/supplier-code-of-conduct>. We continue to require all new suppliers from whom Weatherford procures raw materials and components used in Weatherford's manufacturing operations to agree to the Code of Conduct and to complete a CMRT as part of the terms and conditions of doing business with Weatherford.

Weatherford continues to refine and improve its processes related to the scoping of suppliers covered by the Rule and the tracing and responsible sourcing of 3TG. Future steps to mitigate and address the risk that 3TG contained in our covered products could directly or indirectly finance or benefit armed groups in the DRC may include, but are not limited to:

- Strengthen the quality of supplier data and product data to more accurately identify 3TG in our covered products and supply chain;
- Continue to enhance automation and improve efficiency of data gathering with our third party consultant in order to increase the supplier response rate;
- Improve our ability to identify and trace 3TG to the smelters and associated countries of origin;
- Continue to engage with our suppliers to provide ongoing education regarding 3TG, Weatherford's conflict minerals policy and encourage or require their sourcing from conflict-free smelters; and
- Develop standardized training related to conflict minerals for employees in engineering, manufacturing, supply chain, legal and compliance.

This report includes forward-looking statements that involve risks and uncertainties. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "expects," "plans," "intends," "will," "may," and similar terms. Forward-looking statements are not guarantees of future performance. Weatherford assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law. Subsequent events may affect Weatherford's future determinations under Rule 13p-1 of the Securities Exchange Act of 1934, as amended.

## Annex I

The table below is an aggregation of data provided by the Weatherford's suppliers through March 31, 2017 and lists smelters within our supply chain that either do not source 3TG from the DRC or we were unable to validate the region of sourcing.

Metal	Smelter/Refiner Name	Certification Status	Mine Countries of Origin
