SPECIALIZED DISCLOSURE REPORT**

Weatherford International public limited company

(Exact name of registrant as specified in its charter)

Ireland	001-36504	98-0606750
(State or other jurisdiction of incorporation or organization)	(Commission File Number)	(IRS Employer Identification No.)

Weststrasse 1, 6340 Baar, Switzerland	CH 6340
(Address of principal executive offices)	(Zip Code)

Karl Blanchard	713.836.4000
(Name and telephone number, including area code, of the person to contact in connection with this report)	

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:
 Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2018.

Section 1 - CONFLICT MINERALS DISCLOSURE

Item 1.01 and 1.02 CONFLICT MINERALS DISCLOSURE AND REPORT; EXHIBIT

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended, Weatherford International plc (“**Weatherford**”) evaluated its supply chain to determine if conflict minerals, defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives tantalum, tin, and tungsten, were used in the production or functionality of products manufactured or contracted for manufacture by Weatherford in calendar year 2018.

Conflicts Mineral Disclosure

A copy of this Form SD and the Weatherford Conflict Minerals Report, filed as Exhibit 1.01 hereto, may be found on our website at www.weatherford.com under “Investor Relations” and “SEC Filings.”

Section 2 - EXHIBITS

Item 2.01 EXHIBITS

[Exhibit 1.01](#) - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

-

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 31, 2019

WEATHERFORD INTERNATIONAL PLC

/s/ Karl Blanchard

Karl Blanchard

Executive Vice President and Chief Operating Officer

Weatherford International plc
Conflict Minerals Report
For the Year Ended December 31, 2018

This Conflict Minerals Report of Weatherford International plc (“**Weatherford**,” “**we**,” “**our**” or the “**Company**”) is in accordance with Rule 13p-1 (the “**Rule**”) under the Securities Exchange Act of 1934, as amended.

Company Overview

Weatherford is a multinational oilfield service company and one of the world’s leading providers of equipment and services used in the drilling, evaluation, completion, production and intervention of oil and natural gas wells. We conduct operations in over 80 countries and have service and sales locations in virtually all of the oil and natural gas producing regions in the world. Weatherford is committed to a culture of compliance and committed to tracing the origins of its necessary conflict minerals to ensure that we are sourcing materials and components from companies that share our values and commitment to human rights, ethics and environmental responsibility. We support efforts to increase transparency regarding conflict minerals and to eliminate their use. As a result, we adopted due diligence procedures consistent with the Organisation for Economic Co-operation and Development (“**OECD**”) guidelines and seek to obtain chain of custody declarations from all Weatherford suppliers of columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives (which are limited to tantalum, tin, and tungsten) (“**conflict minerals**” or “**3TG**”) and their derivatives incorporated into products manufactured or contracted for manufacture by Weatherford in accordance with our obligations pursuant to the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act and the Rule.

Product & Supply Chain Overview

We manage our business through four business groups: 1) Production, 2) Completions, 3) Drilling and Evaluation, and 4) Well Construction. We have evaluated our product lines and made a good faith determination that conflict minerals were necessary for the production or functionality of some products manufactured or contracted for manufacture by Weatherford in calendar year 2018. These products include, but are not limited to (the following collectively, “**Covered Products**”):

- liner hanger systems,
- fishing recovery tools,
- rotating cement heads,
- downhole deployment valves,
- pressure control equipment,
- inflatable packers,
- casing packers,
- thru-tubing equipment,
- wellbore tubulars,
- casing and running tools,
- drilling casing bits,
- centralizers,
- float equipment,
- stimulation sleeves,
- expandable sand screens,
- composite plugs,
- inflow control devices,
- gravel pack systems,
- production packers,
- isolation valves,
- RFID enabled tools,
- subsurface safety valves,
- pressure pumping systems,
- continuous rod products,
- gas lift valve systems,
- rotaflex pump units,
- gas lift systems,
- power generation units,
- reciprocating rod lifts systems,
- flow measurement products,
- SurgeMaster®II tool,
- drilling rental tools,
- performance drilling tools,
- mechanized rig equipment,
- conventional tubular running equipment,
- pump and fluid systems,
- well servicing equipment,
- logging while drilling equipment,
- measurement while drilling equipment,
- directional drilling equipment,
- rotary steerable systems,
- managed pressure drilling systems,
- rotating control devices,
- advanced flow detection systems, and
- steady state continuous flow systems

Weatherford’s global supply chain is complex with multiple levels of suppliers between us and upstream conflict minerals producers. Further, our Covered Products consist of many component materials and parts, with multiple suppliers potentially contributing to a single product. As a downstream purchaser and user of conflict minerals, we do not have direct visibility into, and are always many layers removed from, smelters or refiners of 3TG (“**SORs**”) and the associated mines of origin. Therefore, we must rely on our direct suppliers (“**tier 1 suppliers**”) and their suppliers (“**tier 2 suppliers**”) to provide the information necessary to trace the source and chain of custody of 3TG that may exist in our Covered Products.

Reasonable Country of Origin Inquiry (RCOI)

This year, we continued the refinement of our RCOI program and processes. We undertook an extensive manual review of material safety data containing engineered design product information. From this material safety data, we identified the Covered Products and the corresponding direct suppliers in the supply chain of our manufacturing businesses falling within the scope of the Rule. This comprehensive review enabled us to refine the scope of the suppliers we reasonably believe are covered by the Rule by identifying specific product or products supplied to Weatherford that may contain 3TG. Our review identified 1,037 tier 1 suppliers within the scope of the Rule for 2018. This represents a 23% reduction in the number of tier 1 suppliers within the scope of the Rule from 2017. As part of our announced transformation plan, we have undertaken a comprehensive review of our supply chain with a view towards improving efficiency. Through the transformation plan, we have reduced our overall number of suppliers and also significantly reduced the number of our manufacturing facilities. As a result of these initiatives, we reduced our total number of tier 1 suppliers in 2018 and we expect further reductions in 2019. We believe that these refinements to our supply chain will help us to manage and mitigate the risk that conflict minerals from the Democratic Republic of the Congo or adjoining countries (“**DRC**”) are used in our Covered Products.

Weatherford, with the assistance of a third-party consultant, contacted the 1,037 tier 1 suppliers to request and collect information on a product level as to the use and origin of 3TG. Utilizing the Conflict-Free Sourcing Initiative’s Conflict Minerals Reporting Template (“**CMRT**”), suppliers were asked to provide information regarding the existence of 3TG in specifically identified materials and products sold to Weatherford and the sourcing of these materials, with the ultimate goal of identifying the SORs and associated mine countries of origin connected to 3TG. Suppliers were provided multiple options for uploading or providing the information. If a supplier was unable to provide one or more product-specific CMRTs, the supplier could choose to provide a company-level or user-defined CMRT. Suppliers unable to provide a CMRT on their own behalf were requested to provide relevant information on their tier 2 suppliers. We then contacted these tier 2 suppliers, and subsequent tiers of suppliers as needed.

If suppliers did not respond to our request for information, our third-party consultant made multiple additional attempts to contact them via emails and telephone calls. Through our engagement and outreach to our suppliers, we continued to inform, educate and assist our suppliers who remain unfamiliar with conflict mineral rules, Weatherford’s conflict minerals compliance program, our related policies and the supplier’s obligations under their contracts with Weatherford and our Supplier Code of Conduct. If, after these efforts, a supplier still did not register within the system or provide the information requested, the matter was further escalated internally and there was direct outreach by Weatherford.

RCOI Results

This reporting year, 721 suppliers, or approximately 70%, responded to our request to provide CMRTs, an increase over the 68% response rate we achieved last year. Of the suppliers who responded, 37% indicated one or more conflict minerals are necessary to the functionality or production of our Covered Products. Based on a reasonable country of origin inquiry, we have reason to believe that conflict minerals necessary to the functionality or production of our Covered Products may have originated in the DRC. We performed additional due diligence measures on the source and chain of custody of the necessary conflict minerals in our Covered Products, as described below.

Due Diligence

Design

The design of Weatherford's due diligence framework conforms to the due diligence-related steps of OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, second edition ("**OECD Guidance**").

Measures Undertaken

Once we received information from suppliers in the CMRTs, we evaluated responses for plausibility, consistency, and gaps in information. If, during the evaluation, any quality control flags were raised regarding the veracity or accuracy of information, suppliers were automatically contacted again on a bi-weekly basis up to an additional three times to confirm or verify the information. Examples of quality control flags are:

- One or more SORs were listed but no conflict mineral was listed by the supplier;
- SOR information was not provided for a conflict mineral used by the supplier, or the listed SOR was not a verified metal processor in the database of our third-party consultant;
- Supplier answered yes to sourcing from the DRC, but none of the SORs listed are known to source from the region;
- Supplier indicated that they have not received 3TG data for each metal from all relevant suppliers;
- Supplier indicated that they have not identified all of the SORs used for the Covered Products;
- Supplier indicated they have not provided all applicable SOR information received; and
- Supplier indicated 100% of the 3TG for products covered by the declaration originated from scrap/recycled sources, but one or more SORs listed are not known to be exclusive recyclers.

With the supplier information collected and evaluated as described above, we used information collected by industry groups and our third-party consultant to verify the identified SORs. Through an outreach process we attempted to verify (1) the types of metal processing performed (including exclusive recycling), (2) the mine countries of origin of the conflict minerals, (3) the conflict-free certification status of the identified SORs, and (4) the due diligence measures being conducted for those entities that are not conflict-free certified. We compared the supplier-identified SORs to the list of SORs which have received a "conflict free" designation based on internationally accepted audit standards of (a) the Responsible Minerals Assurance Process developed by the Responsible Minerals Initiative, (b) the London Bullion Market Association Good Delivery Program and (c) the Responsible Jewellery Council Chain-of-Custody Certification. If the SOR was not certified by one of these three internationally-recognized programs, we attempted to contact the SOR to gain more information about its sourcing practices, including countries of origin and transfer, and whether there were any internal due diligence procedures in place or other processes the SOR takes to track the chain-of-custody on the source of its mineral ores. We also performed internet research to determine whether there were any outside sources of information regarding the SOR's sourcing practices. If the SORs were non-responsive, additional attempts to contact them were made to gather information on mine country of origin and sourcing practices.

Due Diligence Results

Based on the SOR list provided by the suppliers who responded at the product-level and based on publicly available information, we have identified 319 verified SORs that are within our supply chain (see Annex I). Of these SORs, 267 do not source from the DRC. Fifty-two of these SORs indicated sourcing within the DRC, however, all of these SORs are certified as conflict-free.

Measures for Improvement

Weatherford's conflict minerals policy can be found at [https://www.weatherford.com/en/documents/corporate-documents/governance-and-policies/conflict-minerals-policy-\(november-2013\).pdf](https://www.weatherford.com/en/documents/corporate-documents/governance-and-policies/conflict-minerals-policy-(november-2013).pdf). The policy is also included within our Supplier Code of Conduct and can be found at <https://www.weatherford.com/en/documents/corporate-documents/supplier-code-of-conduct/supplier-code-of-conduct-english/>. We continue to require all new suppliers from whom Weatherford procures raw materials and components used in Weatherford's manufacturing operations to agree to the Supplier Code of Conduct (which stresses our commitment to integrity throughout the supply chain and holding our business partners to the same high standards and commitment to a culture of compliance) and to complete a CMRT as part of the terms and conditions of doing business with Weatherford.

Weatherford continues to refine and improve its processes related to the scoping of suppliers covered by the Rule and the tracing and responsible sourcing of 3TG. Future steps to mitigate and address the risk that 3TG contained in our Covered Products could directly or indirectly finance or benefit armed groups in the DRC may include, but are not limited to:

- Strengthen the quality of supplier data and product data to more accurately identify 3TG in our Covered Products and supply chain;
- Continue to enhance automation and improve efficiency of data gathering with our third-party consultant in order to increase the supplier response rate;
- Improve our ability to identify and trace 3TG to the SORs and associated countries of origin;
- Continue to engage with our suppliers to provide ongoing education regarding 3TG, Weatherford's conflict minerals policy and Weatherford's Supplier Code of Conduct and to encourage or require their sourcing from conflict-free SORs;
- Refine our supplier onboarding process and require each supplier to agree to follow the Supplier Code of Conduct and to complete a CMRT as part of the terms and conditions of doing business with Weatherford;
- Continue to make our ethics and reporting hotline, Listen Up, available to all suppliers anytime and from anyplace to allow them to notify us of any failure to comply with our Supplier Code of Conduct or any illegal or unethical activity related to our business;
- Attend webinars and review online resources to learn and understand new developments and best practices in connection with the Rule, OECD Guidance and conflict minerals compliance program design and implementation; and
- Develop standardized training related to conflict minerals for employees in engineering, manufacturing, supply chain, legal and compliance that are integral to our reporting requirements under the Rule.

This report includes forward-looking statements that involve risks and uncertainties. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "expects," "plans," "intends," "will," "may," and similar terms. Forward-looking statements are not guarantees of future performance. Weatherford assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law. Subsequent events may affect Weatherford's future determinations under Rule 13p-1 of the Securities Exchange Act of 1934, as amended.

Annex I

The table below is an aggregation of data provided by the Weatherford's suppliers through April 19, 2019 and lists SORs within our supply chain that either do not source 3TG from the DRC or for which we were unable to validate the region of sourcing.

Metal	Official Smelter Name	Conflict-Free Certifications	Mine Countries of Origin
