Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

This disclosure on Form SD (this “Filing”) for the year ended December 31, 2023 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”). The Rule was adopted by the Securities and Exchange Commission (“SEC”) to implement reporting and disclosure requirements related to Conflict Minerals (as defined by paragraph (d)(1) of Item 1.01 of Form SD) as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC reporting companies that manufacture or contract to manufacture products if any one or more of the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals for reporting year 2023 are gold, columbite-tantalite (coltan), cassiterite and wolframite and their respective derivatives tantalum, tin and tungsten (collectively, “3TG” or the “Covered Minerals”) and may, in subsequent reporting years, include other minerals or derivatives determined by the U.S. Secretary of State to be covered by the Rule. As used in this Filing, “Weatherford,” “we,” “our” and “us” refer to Weatherford International plc and its consolidated subsidiaries.

Weatherford has conducted a reasonable country of origin inquiry of its suppliers to determine whether any Covered Minerals necessary to the functionality or production of a product manufactured by, or contracted to be manufactured for, Weatherford during 2023 originated in the Democratic Republic of the Congo or an Adjoining Country (as defined by paragraph (d)(1) of Item 1.01 of Form SD).

Weatherford performed due diligence on the source and chain of custody of its Covered Minerals that conforms in all material respects with the Rule and the Organization for Economic Cooperation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas. A copy of this Filing, including the Conflict Minerals Report filed as Exhibit 1.01 hereto, are publicly available on our website at <https://www.weatherford.com/investor-relations/financial-information/sec-filings/>. Our website and the information accessible through it are not incorporated herein by reference.

Item 1.02 Exhibit

We have included as an exhibit to this Filing the Conflict Minerals Report required by Items 1.01 and 1.02 of Form SD.

Section 3 – Exhibits

Item 3.01 Exhibits

Exhibit 1.01 – [Conflict Minerals Report](#) as required by Items 1.01 and 1.02 of Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 31, 2024

Weatherford International plc

By: /s/ Scott C. Weatherholt

Scott C. Weatherholt

Executive Vice President, General Counsel,
and Chief Compliance Officer

Weatherford International plc
Conflict Minerals Report
For the Year Ended December 31, 2023

This Conflict Minerals Report (this “*CMR*”) of Weatherford International plc (“*Weatherford*,” “*we*,” “*our*” or the “*Company*”) is an exhibit to our disclosure on Form SD for the year ended December 31, 2023 (our “*2023 Form SD*”), which we have filed with the SEC pursuant to Rule 13p-1 (the “*Rule*”) under the Securities Exchange Act of 1934, as amended.

Company Overview

Weatherford is a leading global energy services company providing equipment and services used in the drilling, evaluation, well construction, completion, production, intervention, and responsible abandonment of wells in the oil and natural gas exploration and production industry as well as new energy platforms. We conduct business in approximately 75 countries, answering the challenges of the energy industry with 340 operating locations including manufacturing, research and development, service, and training facilities.

Weatherford has conducted a reasonable country of origin inquiry (“*RCOI*”) of its suppliers to determine whether any gold, columbite-tantalite (coltan), cassiterite and wolframite and their respective derivatives tantalum, tin and tungsten (collectively, “*3TG*” or the “*Covered Minerals*”) necessary to the functionality or production of a product manufactured by, or contracted to be manufactured for, Weatherford during 2023 originated in the Democratic Republic of the Congo or an Adjoining Country (as defined by paragraph (d)(1) of Item 1.01 of Form SD). Weatherford performed due diligence on the source and chain of custody of its Covered Minerals that conforms in all material respects with the Rule and the Organization for Economic Cooperation and Development (“*OECD*”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.

Through our RCOI, we seek to trace the origins of any Covered Minerals incorporated into products manufactured by, or contracted to be manufactured for, Weatherford to ensure that we are sourcing materials and components from companies that share our values and commitment to human rights, ethics and environmental responsibility. Weatherford supports efforts to increase transparency regarding Covered Minerals with a view to enabling the Democratic Republic of the Congo and Adjoining Countries (each a “*Covered Country*” and collectively, the “*Covered Region*”) to benefit from their mineral resources while preventing the extraction and trade of minerals from being a source of conflict, human rights abuses, and insecurity. We have also implemented other due diligence measures, which together with our RCOI, we believe conform in all material respects with the Rule and OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, third edition (“*OECD Guidance*”).

Covered Products Overview

We offer our services and technologies in relation to the well life cycle and have three reportable segments: (1) Drilling and Evaluation (2) Well Construction and Completions, and (3) Production and Intervention. All of our segments are enabled by a suite of digital monitoring, control and optimization solutions using advanced analytics to provide safe, reliable and efficient solutions throughout the well life cycle, including responsible abandonment at the end of the well’s productive life.

- Drilling and Evaluation (“DRE”) offers a suite of services including managed pressure drilling, drilling services, wireline and drilling fluids. DRE offerings range from early well planning to reservoir management through innovative tools and expert engineering to optimize reservoir access and productivity.
- Well Construction and Completions (“WCC”) offers products and services for well integrity assurance across the full life cycle of the well. The primary offerings are tubular running services, cementation products, completions, liner hangers and well services. WCC deploys conventional to advanced technologies, providing safe and efficient services in any environment during the well construction phase.
- Production and Intervention (“PRI”) offers a suite of reservoir stimulation designs, and engineering capabilities that isolate zones and unlock reserves in conventional and unconventional wells, deep water, and aging reservoirs. The primary offerings are intervention services & drilling tools, artificial lift, digital solutions, sub-sea intervention and pressure pumping services in select markets.

We have evaluated each of our product lines and made a good faith determination that Covered Minerals were necessary for the production or functionality of some products manufactured by, or contracted to be manufactured for, Weatherford during calendar year 2023 (the “**Covered Products**”). Our Covered Products include, but are not limited to:

- liner hanger systems,
- fishing recovery tools,
- rotating cement heads,
- downhole deployment valves,
- pressure control equipment,
- inflatable packers,
- casing packers,
- thru-tubing equipment,
- wellbore tubulars,
- casing and running tools,
- drilling casing bits,
- centralizers,
- float equipment,
- stimulation sleeves,
- expandable sand screens,
- composite plugs,
- inflow control devices,
- gravel pack systems,
- production packers,
- isolation valves,
- RFID enabled tools,
- subsurface safety valves,
- pressure pumping systems,
- continuous rod products,
- gas lift valve systems,
- rotaflex pump units,
- gas lift systems,
- power generation units,
- reciprocating rod lifts systems,
- flow measurement products,
- SurgeMaster®II tool,
- drilling rental tools,
- performance drilling tools,
- mechanized rig equipment,
- conventional tubular running equipment,
- pump and fluid systems,
- well servicing equipment,
- logging while drilling equipment,
- measurement while drilling equipment,
- directional drilling equipment,
- rotary steerable systems,
- managed pressure drilling systems,
- rotating control devices,
- advanced flow detection systems,
- steady state continuous flow systems,
- under-reamers,
- open hole logging tools,
- cased hole logging tools,
- automated tubular running equipment,
- downhole pressure, temperature and flow measurement gauges,
- distributed fiber optics systems,
- stage tools,
- industrial pump systems,
- sub-surface plugs,
- artificial lift controllers,
- drill pipe risers,
- flowbank tanks, and
- surface manifolds

Supply Chain Overview

Our global supply chain function is responsible for sourcing, procurement, supply and operations planning, and inventory management of raw materials, inventory, finished goods, and services to support the Company's operations. We have approximately 9,900 suppliers in seven geographic regions globally. The major categories in our supply chain related to Covered Minerals are machining services, field equipment manufacturers and raw materials. Approximately 31% of our suppliers are based in North America.

Weatherford's global supply chain is complex with multiple levels of suppliers between us and upstream producers of Covered Minerals. Further, our Covered Products consist of many component materials and parts, with multiple suppliers potentially contributing to a single product. As a downstream purchaser and user of Covered Minerals, we do not have direct visibility into, and are many layers removed from, smelters or refiners of Covered Minerals ("**SORs**") and the associated mines of origin of the Covered Minerals. Therefore, we must rely on our direct suppliers ("**tier 1 suppliers**") and their suppliers ("**tier 2 suppliers**") to provide the information necessary to trace the source and chain of custody of Covered Minerals that may exist in our Covered Products.

Reasonable Country of Origin Inquiry (RCOI)

Each year, we strive to improve our RCOI process to better identify whether any Covered Minerals are or may become necessary to the functionality or production of any of our Covered Products. Our RCOI begins with the identification of our Covered Products based on information maintained by our various business segments and functional support groups. We then manually review and validate the list of Covered Products. We identified specific product components supplied to Weatherford that may contain Covered Minerals and the corresponding tier

1 suppliers. We assessed the risk posed by each such tier 1 supplier based on the type(s) of product component(s) supplied by, and our total spend with, the supplier. Through this review and risk assessment, we focused our RCOI on the tier 1 suppliers that we deemed appropriate. This year, our review identified 697 tier 1 suppliers within the scope of the Rule for 2023. This represents approximately a 5.3% decrease from 2022. We attribute this decrease to our continuing efforts to streamline our supply chain, improve efficiency in our operations, become more knowledgeable about our tier 2 suppliers, and improve supplier compliance with our policies.

Weatherford, with the assistance of a third-party consultant, contacted the 697 tier 1 suppliers to request and collect information about the use and origin of Covered Minerals used in the products and components supplied to Weatherford. Utilizing the Responsible Minerals Initiative's Conflict Minerals Reporting Template ("**CMRT**"), suppliers were each asked to provide information regarding any Covered Minerals necessary to the functionality or production of products that it sold to Weatherford and its sourcing of materials, with the ultimate goal of identifying the SORs and associated countries of origin with respect to such Covered Minerals. We identified, for each such supplier, the products and components that Weatherford sourced from it, and this information was communicated to that supplier as part of the data request. The suppliers were asked to select a given product or set of products for which a CMRT was being submitted. Suppliers were able to submit multiple CMRTs as needed to address all indicated products. Some suppliers chose to submit a company wide CMRT.

If suppliers did not respond to our request for information, our third-party consultant made additional attempts to contact them via emails and telephone calls and offered assistance in completing the CMRTs and providing the requested information. Through our third-party consultant, we continued to inform, educate and assist our suppliers with information about the Rule and its applicability to us, Weatherford's due diligence efforts related to Covered Minerals, our related policies and the supplier's obligations under their contracts with Weatherford and our Supplier Code of Conduct. If, after these efforts, a supplier still did not register within the system or provide the information requested, the matter was further escalated internally and there was direct outreach by Weatherford employees in our supply chain function that have direct business interactions with the tier 1 suppliers.

RCOI Results

This reporting year, 611 suppliers, or approximately 88%, responded to our request for CMRTs, which is an increase from the 75% response rate we achieved last year. Of the suppliers who responded, 35% included information suggesting to us that one or more of the Covered Minerals sourced from the Covered Region may be necessary to the functionality or production of one or more of our Covered Products. We performed additional due diligence measures on the source and chain of custody of Covered Minerals in our Covered Products, as described below.

Due Diligence

Design

We believe the design of Weatherford's due diligence framework conforms in all material respects with the Rule and OECD Guidance.

Measures Undertaken

Our third-party consultant evaluated the CMRT responses provided by our suppliers for plausibility, consistency, and gaps in information. Suppliers were asked to correct or confirm any information that may have raised questions

or violated any quality control thresholds. Suppliers that failed to respond to such requests were automatically contacted again on a bi-weekly basis up to an additional three times. Examples of quality control thresholds are:

- One or more SORs were listed but no Covered Mineral was listed by the supplier;
- SOR information was not provided for a Covered Mineral used by the supplier, or the listed SOR was not a verified metal processor in the database of our third-party consultant;
- Supplier answered yes to sourcing from the Covered Region, but none of the SORs listed are known to source from the region;
- Supplier indicated that they have not received 3TG data for each metal from all relevant suppliers;
- Supplier indicated that they have not identified all of the SORs used for the Covered Products;
- Supplier indicated they have not provided all applicable SOR information received; and
- Supplier indicated 100% of the 3TG for products covered by the declaration originated from recycled or scrap sources, but one or more SORs listed are not known to be exclusive recyclers.

For each supplier-identified SOR our third-party consultant sought to verify: (1) the types of metal processing performed, including recycling; (2) the mine countries of origin of the Covered Minerals, excluding recycled materials; (3) the current conflict-free certification status; and (4) the extent of any known third-party due diligence underway. With respect to item 3, we referenced (collectively, the “*Certifying Organizations*”): (a) the Responsible Minerals Assurance Process developed by the Responsible Minerals Initiative (“*RMF*”); (b) the London Bullion Market Association Good Delivery Rules; and (c) the Responsible Jewellery Council Chain-of-Custody Certification. Our third-party consultant attempted to contact each uncertified SOR to gain more information about its sourcing practices, including countries of origin and transfer, and whether there were any internal due diligence procedures in place or other processes the SOR takes to track the chain-of-custody on the source of its mineral ores. As appropriate, our third-party consultant made additional attempts to contact SORs and conducted internet searches for publicly available information about them and their sourcing practices.

Due Diligence Results

Our third-party consultant verified 352 supplier-identified SORs within our supply chain (see Annex I). Of these SORs, most did not indicate sourcing within the Covered Region. Of the SORs that did indicate sourcing within the Covered Region, all but seven are certified as conflict-free with respect to the applicable Covered Mineral(s) by at least one of the Certifying Organizations, compared to eight in the prior year.

Of the seven uncertified SORs identified this year, two SORs that supplied gold are, themselves, located in the Covered Region and reported no known country of origin for their source material. Of these two SORs, one is reportedly in the process of obtaining their “conflict-free” certification or designation from one of the Certifying Organizations. Another uncertified SOR that supplied tin is reportedly in the process of obtaining their “conflict-free” certification or designation. The remaining four SORs reported sourcing material within the Covered Region as well as from numerous countries outside the Covered Region.

We plan to engage those of our suppliers that may have introduced products into our supply chain from one or more of the SORs that are neither certified nor in the process of obtaining certification to explore joint outreach and alternative sourcing options available to Weatherford. With respect to the two SORs who are in the process of obtaining certification, we plan to monitor their respective progress toward obtaining a conflict-free certification. Of the two SORs that were reportedly in the process of obtaining certification in our prior year report, one remains in our supply chain and remains in the process of obtaining certification.

Description of Ongoing Program

Weatherford's conflict minerals policy was amended and restated on May 26, 2021 can be found at [https://www.weatherford.com/documents/corporate-documents/governance-and-policies/conflict-minerals-policy-\(november-2013\)/](https://www.weatherford.com/documents/corporate-documents/governance-and-policies/conflict-minerals-policy-(november-2013)/). The policy is also included within our Supplier Code of Conduct which can be found at <https://www.weatherford.com/en/documents/corporate-documents/supplier-code-of-conduct/supplier-code-of-conduct-english/>. Our website and the information accessible through it are not incorporated herein by reference.

We continue to require, as part of our standard terms and conditions, that our suppliers complete a CMRT and agree to the Supplier Code of Conduct (which stresses our commitment to integrity throughout the supply chain and holding our business partners to the same high standards and commitment to a culture of compliance). We continue to improve our internal procedures to validate compliance with our Supplier Code of Conduct and vendor on-boarding including creating an escalation path within our supply chain and up to executive officers when vendors fail to provide CMRTs or are identified as utilizing SORs that are not certified as conflict free or sourcing from locations outside the Covered Region.

This report includes forward-looking statements that involve risks and uncertainties. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements are also generally identified by the words "expects," "plans," "intends," "will," "may," "remain," "continue," "ongoing," and similar terms, although not all forward-looking statements contain these identifying words. Forward-looking statements are not guarantees of future performance. Weatherford assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law. Subsequent events may affect Weatherford's future determinations under the Rule.

Annex I

The table below is an aggregation of data provided by Weatherford’s suppliers through April 20, 2024 and lists SORs verified by our third-party consultant as being in our supply chain in 2023.

<i>Metal</i>	<i>Official Smelter Name</i>	<i>RMI Smelter ID</i>	<i>Smelter Country</i>	<i>Country of Origin</i>	<i>Conflict-Free Certifications</i>
